Dr. WALID OSAMY, Benha University, Egypt

Dr. MEHDI SALIMI, Simon Fraser University, Canada

Dr. AHMED M. KHEDR, Sharjah University, UAE

Aim and Scope: We are living in the age of digital and uses services of digital age applications for daily purposes. There are many applications such as health, e-commerce, agriculture, industry, military, cellular etc.. The maximum applications are dependents on communication are the hottest research challenges in these areas. One example for which such methods might be applied is in the analysis of security using environment monitoring through the data and system can significantly affect the results. The main objective of this special issue is to emphasize the recent technological developments and to find research solutions in Communication Systems. Here, we encourage researchers to submit original contributions that propose new approaches for the exploration of issues in security modeling and framework. We especially welcome articles describing the smart use of WSN, IoT, Edge, Fog computing, RFID application. This special issue will to provide a forum for Ph.D. Students, Academicians, researchers, scientists, and students to present the research in this area. In analyzing and classifying security solution from a privacy and authentication perspective, have become a valuable mechanism either to model and handle implement or to establish low overhead techniques to deal with higher security one. Subject coverage for this issues is as follows:

Topics areas include, but not limited to:

- Trust Management
- Attacks and Defenses
- Authentication

- Key Management
- Security and Privacy
- Cyber Security using AI
- Web Security
- FUZZY LOGIC-based Information Security
- Vulnerability Assessment
- Secure sensor and RFID applications in Automotive
- Security of Industry 4.0
- Intelligent Application
- Communication Issue
- ML Issues and Application
- ICT and Management Issues

Proposed Schedule

- Submission deadline: 15 July 2022
 - Author notification: 15 October 2022
 - Revised submission due: 15 November 2022
 - Final notice of acceptance/reject: 15 December 2022
 - Publication: As per the policy of journal
-
